

Hamilton Robison Capital Partners

Sir Isaac Newton is one of the most influential scientists of all time. He is credited with formulating the laws of motion and universal gravitation. If you like science and technology, you'll be interested in Levi's Stadium, where Super Bowl 50 will be played, it's making history of its own:

- Levi Stadium has high definition video boards above both end zones that are 48 feet tall and 200 feet wide, as well as another 2,000 Sony TVs around the venue
- There are Wi-Fi boxes under every 100 seats (offering five times more capacity than the average in-stadium network)
- The stadium features a 27,000 square foot "Green Roof" on the top of the stadium's suite tower... think extremely large garden up there
- There are solar panels on the three pedestrian bridges, the stadium achieves net-zero energy....impressive considering a football game uses about the same amount of electricity it takes to power 400 homes for a month!

Equally impressive were the strategic objectives the Super Bowl 50 Host Committee set out to accomplish: **bringing people together; giving back in a meaningful way; and making a positive, lasting impact on the community.**

These strategic goals, and the use of leading edge technology parallels the strategies we bring to each of our investments. We've learned that **bringing high technology and advanced engineering together with strong management teams usually creates industry leaders.** And when the economics align with technology and a dedicated management team to generate sound profits, we also believe in giving back. We recently sold our portfolio company, MEGTEC Systems, a global leader in highly-engineered industrial and environmental control solutions. The **32 management shareholders participated in the value creation that they were instrumental in achieving, realizing \$15 million of proceeds on their \$1 million investment.**

So on to Super Bowl 50, armed with the knowledge that two bodies in the universe attract each other with a force directly proportional to the product of their masses...hopefully there will be no concussions! If any of **your clients are looking to defy gravity, partner their masses and take their revenues to new heights**, please feel free to contact us at any time.

ABOUT HAMILTON ROBINSON

Hamilton Robison Capital Partners was founded in 1984 to invest directly in small, privately held manufacturing, distribution and service businesses. The firm has maintained its singular focus on this dynamic market to become a valued resource for equity capital and growth strategies for small businesses. Based in Stamford, CT, the firm has completed over \$1.3 billion in transactions supporting 46 companies. Investors include leading financial institutions, funds, family offices, and individuals in the United States and Europe. For more information, visit www.hrco.com.

Past performance is not indicative of future results. These materials are for informational purposes only and do not constitute an offer to sell or a solicitation of an offer to buy any securities. Such offers will be made only pursuant to confidential offering documents. These materials are in no way a substitute for review of those materials. Current and prospective investors should carefully read the relevant offering documents, including the "Risk Factors" section therein before making any investment decision. Investment in a private fund involves a high degree of risk and is suitable only for sophisticated investors. The companies presented here are one of a number of companies in which Hamilton Robison and its predecessor has invested in since 1984. For a complete list of investments, please visit www.hrco.com.
