

Hamilton Robison Capital Partners

Finally, baseball returns! America's favorite past-time has persevered through COVID-19 albeit without chewing tobacco, fist-bumps and high fives! There will be significant changes to the 60 regular season games. The designated-hitter (DH) rule will be used in both leagues and extra-inning games during the regular season will begin with a runner on second base. We should expect a high scoring, record breaking season as **player development at every level has been supercharged with technology**. The K-Vest is becoming a valuable tool in both college and professional sports to assess swing efficiency. The K-Vest is equipped with sensors to provide detailed information about a player's swing. It can evaluate the kinetic sequencing and rates of speed of key muscle/joint movements.

Hamilton Robison understands how **technology and innovation play a critical role for not just athletes but manufacturers in a COVID-19 world**. Moreover, combining technology with Lean process improvement has the potential to "supercharge" ROI enabling investments to move forward in a tight budget environment.

The Lean/Digital Combination

- The **Lean/digital combination is what manufacturers need going forward, "taking the money viewed as waste and using it on products with purpose"** - Colin Parris, CTO GE Digital

AI - Providing Certainty in an Uncertain World

- "Machine learning algorithms have been able to spot patterns and correlations from a much broader array of seemingly unrelated data points to learn the demand patterns and provide forecasts with useable accuracy" - Alan Duncan, Senior Director of Industry Strategy, Blue Yonder

Visualization Technology - More Important than Ever

- "Even when equipment or product experts can't address technical issues in person, AR-enhanced remote assistance enables them to connect with on-site employees and even end customers to offer them contextualized information and expert guidance, helping them resolve these issues quickly and ultimately reduce downtime" - Sarah Reynolds, Vice President of Marketing, PTC

There is one factor that all the experts agree **technology cannot help us with and is crucial to success...courage!** Hamilton Robison is actively **looking to partner with business owners who have the courage to try something new, who are utilizing industrial technology** to deliver solutions that will enable them to grow and succeed in these unprecedented times. Please reach out to us to learn more about the power of a partnership with HRCP. We can be contacted at 203-602-0011 or email below.
